Telehealth Regulatory and HIPAA Security Handbook

1. HIPAA Compliance & Encryption Standards

All video consultations and telephonic digital transmissions must enforce AES-256 end-to-end encryption. Patient electronic protected health information (ePHI) stored at rest must comply with federal HIPAA audit logging requirements.

2. Multi-State Medical Licensure Requirements

Clinicians providing telemedicine consultations across state boundaries must hold an active, unrestricted medical license in the jurisdiction where the patient physically resides at the time of consultation.
